

**Date:**

9/24/18

**Discussion:**

- Meeting and logistical goals
  - Weekly Updates:
    - Done before call meeting
    - Weekly updates sent to box
    - RASICs and PowerPoints
  - Forward RASIC due tomorrow
    - Send data dictionary
    - Lit review half/half
    - Tasks
  - Schedule midpoint presentation (4th week of Oct.)
  - Requirement gathering
- Project
  - Users enter location, property type, total return
  - Black Litterman is preferred, but Markowitz is also useful. They both have uses in particular cases, so look into both.
  - Goals
    - User should be able to input constraints
      - Wishes, constraints such as location
    - Somewhat open ended project on how they want it in the end, will refine this later on once prototypes get made
