

Date:

11/28/2018

Attendance

- Our Team:
 - Blake, Nick, Lee
- Principal:
 - Ben

Questions going into the meeting

- How cvxpy uses constraints in optimization

Overview on what was Discussed

- Cvxpy constraints
- Finals and break

Discussion

- Have super list of constraints for every market and possible constraint
 - Have default values for non-specified constraints
 - Market, property type, and combination
- Risk inputs
 - Some level of risk comfortable with
 - Range of risk values as input
 - Always maximize return
- Principal IT looking into Embedded login
- Principal join final presentation??
 - Remote or in-person?
- Where markets lie on efficient frontier
 - Then see where user's portfolio is
- December meetings
 - Not 10th, 24th, or 31st
 - Discuss within
