<u>Date:</u>
04/04/2019

<u>Attendance</u>
- Our Team:
  - Blake, Cole, Kevin, Lee, Nick
- Other:
  - Ben, Jonathan Ling

<u>Questions going into the meeting</u>

<u>Overview on what was Discussed</u>

<u>Discussion</u>
- Currently we are connecting all the pieces together
  - Individually, the parts are mostly all functional
- User testing
  - Feedback form is set up and connected to a spreadsheet
  - Will run through demos with Principal to get more feedback
  - Display the results for the presentation
- PowerBI
  - Efficiency frontier graph
    - Barebones set up with dummy data
    - Need actually data for it
  - Dataset functionality basics set up, almost done
    - Schema of the data needs to be finalized
- Dash
  - Constraints are good to go
- Deployment
  - Should be able to integrate this into Principals AWS servers fairly easily
